

Statement of Support

TIE Holding N.V.

TIE is an established SME offering SaaS and License software and services in the fields of Content Syndication, Business Integration and eCommerce.

As such, Service and Software engineering are critical to TIEs technical and thus commercial success and which is why TIE has been extremely supportive of NESSI with resources and activity far beyond what a SME might normally provide.

TIE believes that 'joined-up' research and development (and later innovation) such as that promoted by the NESSI SRA can be instrumental to ensure a level playing field for all companies especially small and medium sized companies like ourselves.

Amongst many NESSI areas, TIE has been a significant player in the SOA4All FP7/IP and NESSI strategic project which has successfully just culminated. From this TIE has taken advantage of increased service technologies knowledge. We have also commenced the process of deploying technical knowledge and developments from our RTD unit into our commercial Mambo5 eCommerce area which has already been demonstrated to many of our customers with great interest. Further we hope and expect this will lead to further business opportunities in the field of Integration, Mobile, and Open Data through Service and Semantic interconnections.

On behalf of TIE

J.B. Sundelin
Chief Executive Officer

Content Syndication - E-commerce - Business Integration
